SUSTAINABLE FOREST

OUR STORY

AMAZON GOLD

SUSTAINABLE WOODS

Amazon Gold teak farms have grown from selected seeds of mother trees, collected 35 years ago. Teak, Fustic, Saman, balsa, bamboo, many other species and medicinal trees have been planted in the paradise of Ecuador at the riverside of the San Pablo in Quevedo Ecuador. Local staff has been trained to prune and care for those trees all the time, without any artificial fertilizers nor chemicals. This converts us into a CO2 negative venture, protecting the environment and generating tons of oxygen.

Today, after 35 years, trees and Bamboo are ready to be harvested sustainably and be converted into boards, beams, cross laminated products (CLT) composite laminates for outdoor, out of massive teak or combined with bamboo and balsa or other woods, for you and your customers. We are also thinking in the yacht and automobile industry and for beautiful desktops or planks for dining tables or decks for balconies or around swimming pools

THE TEAKWOOD WORLD

AMAZON GOLD

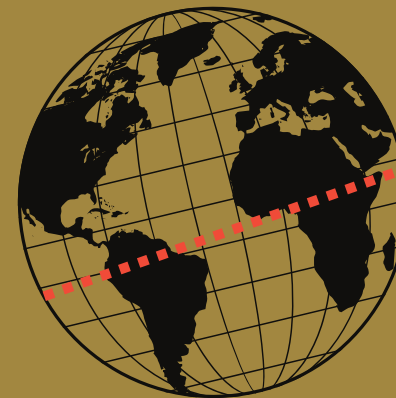

SUSTAINABLE WOODS

Fernan Sanchez (*Triplaris cumingiana*)

We have two tropical forests located near Quevedo–Ecuador, 30 and 35 years old, where teak, bamboo, fustic, other hardwoods and medicinal trees grow. Nature converts CO2 into oxygen, providing fresh air to the environment which makes us a co2 negative company.

Teak wood stands out for its properties when used outdoors, especially for its natural durability. It is currently one of the best known tropical woods in the market and has many uses, as ship building, house construction and outdoor and indoor furniture, decks and balconies.

Near the Equator the climatic and natural conditions in our farms are perfect for growing trees.

Teak is the queen of the woods for its magnificent natural durability and dimensional stability. It has an antiseptic resin that makes it resistant to attacks by various organisms, as termites or fungi. It also has a natural oil that makes it waterproof and resistant to extreme weather conditions, so it is perfect for outdoor use for decks yachts, etc.
